Introducing ClassVR

Since 2017, we've been dedicated to one mission: making virtual reality a meaningful part of education across the nation. When we created ClassVR, our goal was simple – to give teachers an easy, safe, and powerful way to bring learning to life.

What started as an idea by educators in an office Chicago has grown into a trusted solution used in every state by millions of students. Teachers choose ClassVR because it's designed for the classroom, packed with curriculum-aligned content, and supported by a team that understands education inside and out.

Together, we're shaping a future where every student can explore, discover, and achieve more than ever before.

As seen in:

Award Winning Technology

We're proud to be the most awarded virtual reality solution for education. These awards reflect the difference ClassVR is making in classrooms every day, where teachers are using it to engage students and bring lessons to life. Designed specifically for schools, ClassVR combines simple classroom management with a wide range of curriculum-aligned resources, making it both practical for teachers and inspiring for learners.

Meet the Team

Huw Williams

Chief Executive Officer

Our team is driven by a shared vision to inspire a world of learning where the impossible becomes possible. With expertise in education, technology, and innovation, we collaborate tirelessly to create cutting-edge VR/AR solutions that empower educators and inspire students. Together, we strive to make learning more engaging, interactive, and unforgettable.

Join us on our journey to shape the future of education through the power of virtual reality.
